

Hi Paul & Tatiana,

We're hearing from a lot of parents that they're starting to see THESE warning signs pop up:

- The first report card is causing anxiety.
- There are concerns with feedback from teachers.
- Your child's confidence level is dropping.

If any (or all) of these things sound familiar, you're not alone. It's hard to know what the effects of the last few years are having on kids right now. Plus, report cards and standardized tests just don't give you the full picture.

You can get a clear picture of your child's academic health with a **\$49 Sylvan Insight™ Assessment**. It's our **most popular product** and an **in-depth evaluation** you won't find anywhere else.

These savings will allow you to take action now, address what's been missed and ensure success this year (and beyond!).

Here's what parents are saying about our assessment:

“ I learned more about where my son is academically through the Sylvan Assessment than I have from any school grades and standardized tests. ”

“ I felt it was money well spent to see where my child's weak areas and strengths were—plus the follow-up plans to hit every one of those areas. ”

“ We thought my son had issues with math, but Sylvan's assessment showed us it's actually his reading comprehension. I'm glad to have discovered the real issue. ”

[YES, I'm ready to schedule my child's \\$49 assessment! >>](#)

Looking forward to hearing from you,

Judith Hennessy
